Comments

(Set forth by above question #, if applicable. Use "Additional Comments" Sheet, if needed)

File #: 95-224797			
#1. There is insufficient d	ocumentation to determine if	the hair comparison was	performed in a scientifically
acceptable manner.			•
#2. The results are not ade	equately documented in the n	otes. The notes are not da	ted, are in pencil and are not
initialled by the technician	ı(s). Some hair were deemed	unsuitable for comparison	n with no reason or explanation
given. The notes do not in	dicate the packaging of the it	tems or the presence/abse	nce of a seal on them.
#4. The examiner testifies	: "I examined", "I did" remov	ve a hair from Q1, "I obse	rved". The notes indicate the
technician examined, obse	erved and removed the hair or	n Q1. This is misleading.	
The examiner was aske	ed if the container of Q1 was	sealed when he received i	it. At first, he said it was, but the
seal is not documented in	the case notes. When asked h	ow he knew it was sealed	, he said "I have a standing
ruleifnot sealed I will	not examine it". This is not pr	roper documentation.
